

Tam Nguyen Dinh

DevOps Intern

kainguyen615@gmail.com • 0909776335 • github.com/kaing615 • linkedin.com/DinhTamNguyen

Education

University of Information Technology - VNUHCM
Major: Computer Networks and Data Communications

Ho Chi Minh City, Vietnam
2023 - 2027

Certificates & Achievements

VNUHCM English Proficiency Test

B1.4 (241/400)

Silver Medal - HCMC High School Students Olympic Competition (Physics)

2021

Projects

End-to-End Microservices Deployment Platform

GitHub

Technologies: Spring Boot, React, Docker, Kubernetes, Terraform, AWS, GitHub Actions, ArgoCD

- Developed and deployed a full-stack microservices application using Spring Boot and React.
- Containerized services with Docker and orchestrated deployments on Kubernetes hosted on AWS.
- Automated infrastructure provisioning and environment setup using Terraform.
- Built CI/CD pipelines with GitHub Actions for build, testing, image publishing, and deployment.
- Implemented GitOps continuous delivery using ArgoCD across Kubernetes environments.

AI-Powered Microservices Platform on Amazon EKS

GitHub

Technologies: Kubernetes, Amazon EKS, Docker, Terraform, Jenkins, GitHub Actions

- Built and deployed an AI-powered microservices platform on Amazon EKS using Docker and Kubernetes.
- Automated cloud infrastructure provisioning and Kubernetes resource management with Terraform.
- Designed CI/CD workflows using Jenkins and GitHub Actions.
- Implemented monitoring and observability using Prometheus and Grafana.
- Applied DevOps and cloud-native practices to improve scalability and deployment efficiency.

Skills

DevOps & Cloud: Kubernetes, Docker, Terraform, AWS (EKS, EC2, S3), GitHub Actions, ArgoCD, Jenkins

Operating Systems: Linux (Ubuntu), Shell Scripting

Monitoring: Prometheus, Grafana

Programming: Python, Bash, JavaScript

Backend: Node.js (ExpressJS)

Infrastructure: Ansible, Kubespray

Version Control: Git, GitHub

Networking: Basic Networking
